

PaperPro

Next-gen dairy testing

Our aim

M-Lense Research strives to protect public health and rebuild consumer confidence by innovating rapid, accessible solutions for detecting milk adulteration. Our commitment to transparency ensures the purity and safety of dairy, promoting well-being for everyone.

PaperPro at glance

Introducing our revolutionary Milk Adulteration Testing solutions, designed to detect 7 common types of adulterants (Urea, H_2O_2 , Soda, Common salt, Detergent, Starch & Boric acid) found in milk instantly, effectively, and at an affordable cost.

This innovative solution ensures that you and your loved ones consume pure and unadulterated milk, safeguarding your health and well-being.
